[ruildodcl.ca](http://ruildodcl.ca)

Young & eager professional with an Interactive Media & Design background looking to transition to an entry-level Frontend Web Developer role. Their design background lends to creative problem solving skills with a keen eye and attention to detail whilst developing frontend interfaces

## RELEVANT EXPERIENCE

### Tiiny.Host – Apprentice

01/2022 – PRESENT

- Improved performance of a SaaS web app by refactoring legacy code utilizing various technologies such as the **context API**, **React.js hooks** etc.
- Co-operated with Mentor to ensure efficacy and uniformity of the code, allowing for simpler modifications for future updates and bug fixes of the site which receives **30,000 visitors a month**.
- Further developed the quality of live features of the UI, increasing useability, leading to a simpler customer workflow and better engagement.

### Graphic Plus Media – Digital Designer, Richmond Hill

07/2018 – PRESENT

- Developed Schlegel Villages’ Kiosk webapp, for retirement center. An HTML single page applications utilizing **bootstrap**, **jQuery** to create a modular unified design and tracks user selection and **Waypoint** for the carousel to create a simulated suit exploration.
- Coordinated with the team to strategize the design, layout of the app and implementation of features such as an interactive Suit exploration. Using **Marzipano** to create a Panoramic tour as a placeholder to help visualize what the outcome would look like.
- Utilized skills with Industry standard tools; **Adobe Suite** and CC, to **design** the visuals and possible layouts for the web app.
- Created content for Graphic Plus Media’s social medias, YouTube, and Instagram, and for their clients, maximizing engagement and interactions across social media generating leads.

## EXTRA CURRICULARS

### Pixaria – [mcmoffin.github.io/pixaria/](https://mcmoffin.github.io/pixaria/)

- Created a single page image gallery with a customized layout to resemble varied dimensions of paintings in an art gallery.
- Built upon **Pexels’ API** to generate real posts and images from real users updated every week utilizing **React** and **SCSS**.

### Speakerhead – [ruildodcl.ca/pages/festival\\_website/index.html](http://ruildodcl.ca/pages/festival_website/index.html)

- A beautiful four-page website for a music festival with scroll triggered animations and page transitions.
- Assembled with **SCSS**, **Barba**, **Greensock** and **Scroll Magic** libraries for the intricate scroll parallax animations and page transitions.

## EDUCATION

Durham College, Oshawa, ON — Degree Interactive Media and design

2015-2018
